Simplify Student Information Management

Is managing student records a challenge? A comprehensive Enterprise Content Management (ECM) system from Digitech Systems and EMPOWER Student Information System can help you manage your records with ease.

DIGITECH SYSTEMS

EMPOWER
STUDENT INFORMATION SYSTEM

EMPOWER Your Students with Enhanced Document Protection

- Click on any student record to access all associated documents, eliminating the risk of duplication or loss.

- Back up all records for increased security.

- Secure records by allowing the administrator to choose who can access the files.

- Improve your record processing time, allowing staff to view student records faster.

Conveniently Manage Student Records

- Simplify document and information management with a suite of user-friendly products.

- Centralize document and record storage in one place, securing valuable records from theft or loss.

- Access records securely anytime, from vitually any device.

- Increase productivity by sharing information easily between offices, eliminating the need for faxing, emailing, or hand-delivering documents.

Your Comprehensive Solution

Together, Digitech Systems and EMPOWER Student Information System make a powerful team, allowing you to access and store all of your students' records in one secure location. EMPOWER allows secured access to any record in any student's file, gathered from admissions to graduation, while keeping them all together. It is a fully integrated student information system that supports the management needs of colleges and universities. ImageSilo® is the integrated cloud that will make it all possible, storing all student data securely, making it accessible anytime, from virtually any device. They work together, helping school administration systems boost productivity and security.

Manage any document, anywhere, anytime with Digitech Systems and EMPOWER Student Information System.
