

Healthcare Records Overload?

*Paper files can be unsecure,
time-consuming and error prone.*

What if you could:

- Increase office **efficiency** by eliminating manual data entry?
- Securely comply with healthcare regulations to improve **control**?
- Save **money** by improving processes?

"The PaperVision® Capture and PaperVision® Enterprise, we're able to ensure protection of more than 10,000 records. Vulnerable information is no longer just sitting in drawers. And the cost savings are remarkable. We've saved more than \$259,625 annually."

- Mary Peelen
Director of HHealth Information Services
