## Schedule A Available Products

January 2025

<b>Product Name</b>	<b>Product Description</b>
<b>PaperVision® Capture Scan</b>	Scan and import documents into batches. Required during any batch step (manual or automated) that scans or imports documents.
<b>PaperVision® Capture Index</b>	Hand-key index value population and validation within batches. Required during any batch step that performs hand-key indexing of documents.
<b>PaperVision® Capture Image Processing</b>	Color and bitonal (black and white) image processing to perform image manipulation and cleanup. Also enables automatic page deletion based on criteria such as page dimensions, color content and blank pages. Required during any step where documents are being scanned or imported for jobs defined to include image processing.
<b>PaperVision® Capture Barcode 1D</b>	One-dimensional (1D) barcode recognition for index value population and document break insertion. Recognition can be performed as images or captured or as a separate automated process. Required during any step where documents are being scanned or imported for jobs defined to include 1D barcode recognition.
<b>PaperVision® Capture Barcode 2D</b>	Two-dimensional (2D) barcode recognition for index value population and document break insertion. Recognition can be performed as images or captured or as a separate automated process. Required during any step where documents are being scanned or imported for jobs defined to include 2D barcode recognition.
<b>PaperVision® Capture Open Text Zonal OCR</b>	Optical Character Recognition (OCR) for index value population and document break insertion as an automated process. Required during any step where documents are being scanned or imported for jobs defined to include optical character recognition (OCR). Available only with Open Text OCR Engines.
<b>PaperVision® Capture Open Text Full Text OCR</b>	Full-Text Optical Character Recognition (OCR) for extracting pages of text and converting recognized results to specific file types as an automated process. Required during any step where documents are being scanned or imported for jobs defined to include full-text optical character recognition (OCR). Available only with Open Text OCR Engines.
<b>PaperVision® Capture Open Text Asian Language Support</b>	Asian Language Optical Character Recognition (OCR) for extracting pages of text and converting recognized results to specific language types as an automated process. Required during any step where documents are being scanned or imported for jobs defined to include Asian Language-text optical character recognition (OCR). Available only with Open Text OCR Engines.

## Schedule A Available Products

January 2025

<b>Product Name</b>	<b>Product Description</b>
<b>PaperVision® Capture QC Manual</b>	Enables operators to apply Quality Control (QC) tags to batches, documents, pages, and indexes. Also allows operators to review batches, documents, pages, and index values using QC Auto Play operations. Required during any step where an operator can apply QC tags to batches, documents, pages, and index values.
<b>PaperVision® Capture QC Auto</b>	Perform Quality Control (QC) review of batches, documents, pages, and indexes as an automated process. Required during any step that performs an automated QC review on batches, documents, pages, and index values.
<b>PaperVision® Capture AP Processing</b>	The AP Processing Step allows users to define data sources in an external Microsoft SQL or Access database for PO and Inventory Receipts and manually match Invoice information stored in PaperVision Capture to existing Purchase Order information. Two named seats are included in a PaperVision Capture Business Rules – AP Processing Module – Three-way-Matching license. It is also sold separately as Named or Concurrent License.
<b>PaperVision® Capture Business Rules</b>	Business Rules, as defined below, are designed to assist with solving more complex job workflows in an automated fashion. The following business rule licenses are available per entity. Each license is sold separately and on a per Entity basis.
<b>PaperVision® Capture Business Rules – General (Entity)</b>	General Business Rule: Used to verify that certain detail fields have been populated in a batch. This rule can also be used to verify that specific index fields meet the following criteria: Date Range, Match Field Value, Missing Field Value, and verification against the National Provider Identifier database. This Rule can also be used to apply Bates Stamp to any image of any document. Sold as a per Entity License.
<b>PaperVision® Capture Business Rules – AP Processing Module – Three-way matching (Entity)</b>	AP (Accounts Payable) Business Rule – is used for data validation and automated three-way matching. It allows for external data sources to be configured to retrieve Purchase Order and Received Goods data. It will perform a three-way match and mark exceptions. In addition to three-way matching, it can perform basic data validation as in verifying that specific detail line items included in an Invoice (including shipping costs, sales tax, etc.) add up to the total amount of an Invoice. This rule also gives a user the ability to verify that each line item within an Invoice was calculated correctly by verifying item quantities and unit prices equal line item totals. This license is included in PaperVision Classification and Extraction (Forms Magic) licenses, it is not included with the on-demand version of Forms Magic license. It is also sold separately as a per Entity License. This license includes 2 named seats of PaperVision Capture AP Processing, for exception handling.

## Schedule A Available Products

January 2025

### Product Name

### Product Description

#### **PaperVision® Capture Business Rules – Forms Magic (Entity)**

Forms Magic Business Rule – When coupled with a separate Forms Magic License, this rule can be used to search a document that has already been classified in Forms Magic to identify and parse index information and populate specific index fields based on keywords found in the classified document. This rule can also be used to merge multiple Forms Magic field sets into a single detail set in PaperVision Capture. This license is included in PaperVision Classification and Extraction (Forms Magic) licenses.

#### **PaperVision® Capture Business Rules – ANSI 837 (Entity)**

ANSI 837 Business Rule can be used for the input of medical claim data. Once configured, it will generate an approved HIPAA 837P EDI ANSI transaction file to use for further processing the claim data. Sold as a per Entity License.

#### **PaperVision® Capture Native Documents (Entity)**

The Native Documents step is an automated job step that lets you import PDFs (.pdf), Word documents (.docx, .doc, .dot), Excel spreadsheets (.xls, .csv, .xlsx), PowerPoint presentations (.ppt, .pptx, .pps), image files (.jpeg, .png, .bmp, .tif, .jpg), email messages (.msg, .eml), PaperVision Filesets, and ZIP files from a monitored folder, or a custom location, and create a new batch that you name. Supported file types in attachments, Filesets and ZIP files are also imported. These documents are converted to images that are used in the batch, while the original native documents are saved as user files.

#### **PaperVision® Enterprise**

Intended for management of documents from central database consisting of multiple projects for one entity; licenses for separate entities must be purchased separately. Includes both desktop and web-based access licenses, Administration Console, desktop scanning, browser-based administration, API's, source code (for web and desktop clients).

Concurrent user license for document management. Initial sales must include one year of product support and maintenance which is sold separately.

#### **PaperVision® Enterprise WorkFlow (User)**

WorkFlow is an individually licensed addition to PaperVision Enterprise. WorkFlow is sold per concurrent user and licensed in conjunction with a PaperVision Enterprise database. PaperVision Enterprise WorkFlow allows concurrent users to participate in workflow routing, custom code execution, parallel workstep processing, and information processing procedures based on a user defined set of business rules. Users also have the ability to define document packages.

Initial sales must include one year of product support and maintenance which is sold separately.

## Schedule A Available Products

January 2025

<b>Product Name</b>	<b>Product Description</b>
<b>PaperVision® Enterprise Report Manager</b>	<p>COLD processing engine: Converts ASCII or EBCDIC print data streams into a report format for retrieval in PVE, including automated indexing, file analysis and a graphic report layout tool.</p> <p>Licensed separately on a per-entity basis. Initial sales must include one year of product support and maintenance which is sold separately.</p>
<b>PaperVision® Message Manager (Included in PaperVision Enterprise)</b>	<p>Enables organizations to process and capture email messages into the PaperVision Enterprise system for regulatory compliance, digital asset management and workflow purposes. Also enables the capture of pre-existing messages from Outlook and Exchange mailboxes.</p>
<b>PaperVision® E-Forms</b>	<p>PaperVision E-Forms enables businesses to capture information as it is input into an electronic, web-based form. The information can also be overlaid onto an existing template image and stored as a document in the ECM system. Create e-forms by simply using a GUI-based designer or using the built-in XML editor. Users can also import existing HTML forms. Use the custom code engine to perform tasks such as populate, validate and save e-form data to an external source. Automatically generate index values from the information entered by the user into the e-form. Make e-forms available on a public site or for internal users.</p> <p>PaperVision E-Forms is a separately licensed component of PaperVision Enterprise, and is licensed for a single Company and database. Each Company license of PaperVision E-Forms provides unlimited e-forms and unlimited e-form submissions.</p>
<b>PaperFlow™ Pro</b>	<p>Scan, Display, Point and Click (Quick Click) Index, Full-Text and Zonal OCR, 1D and 2D Barcode, Match &amp; Merge, Import, Export Conversions. Initial sales must include one year of product support and maintenance which is sold separately.</p> <p>Intended for full-featured Scanning requiring exporting to retrieval software in addition to PaperVision Enterprise. PaperFlow Pro may be purchased in the following volume configurations; 120,000 pages per year, 360,000 pages per year and Unlimited pages per year.</p>

## Schedule A Available Products

January 2025

<b>Product Name</b>	<b>Product Description</b>
<b>PaperFlow™ Direct</b>	PaperFlow Direct is Digitech Systems' latest high-volume document capture solution, integrated directly with PaperVision Enterprise. The product features an easy-to-use Microsoft Office-style ribbon, and no database is required to install or use the product. PaperFlow Direct allows existing PaperVision Enterprise users to create batches and then scan or import images, index documents using barcode, quick-click, and OCR technologies and even perform image processing operations on those documents before releasing the documents directly into PaperVision Enterprise. A PaperVision Enterprise license is consumed when using a PaperFlow Direct license.
<b>PaperFlow™ Choice OCR</b>	Scan, Display, Point and Click (Quick Click) Index, Full-Text and Zonal OCR, match & Merge, Import, Export Conversions. PaperFlow Choice OCR may be purchased in the following volume configurations; 120,000 pages per year, 360,000 pages per year and Unlimited pages per year. Initial sales must include one year of product support and maintenance which is sold separately.
<b>PaperFlow™ Choice Barcode</b>	Scan, Display, Index, 1D and 2D Barcode, Match & Merge, Import, Export Conversions. PaperFlow Choice Barcode may be purchased in the following volume configurations; 120,000 pages per year, 360,000 pages per year and Unlimited pages per year. Initial sales must include one year of product support and maintenance which is sold separately.
<b>PaperFlow™ Lite</b>	Scan, Display, Index, Match & Merge, Import, Export Conversions. Initial sales must include one year of product support and maintenance which is sold separately.  Intended for Scanning with no barcode or OCR indexing needs.
